	Zone 14 1st Sweeping - June 29, July 1 2nd Sweeping - Aug 3 3rd Sweeping - Aug 9 4th Sweeping - Oct 14

- The sweeping schedule is designed to avoid conflicts with regular scheduled garbage pickup days.
- Please refrain from parking on the roadways during their scheduled day(s) to be swept.**
- Initial cleanup (1st sweeping) takes longer due to the sand that is spread on the roadways during the previous winter season. The schedule reflects this.
- Primary roadways will be swept at any time due to no parking allowed.
- Secondary roadways will be swept from 7am - 5pm, and may be swept on the same day(s) as the scheduled zone day(s) that they are located in (if time permits). Otherwise, they will be swept on Secondary roadway sweeping days.
- Zone 1DT will be swept from 3am - 7am on its scheduled days.
- Zones 2 thru 14 will be swept from 7am - 5pm on their scheduled days.
- Private streets and parking lots are not swept by the City of Watertown.
- Hard surface alleys and city owned parking lots will be swept as needed. No schedule is set.
- Changes or suspension of scheduled sweeping may occur due to excessive rain, freezing temperatures, snow, equipment breakdowns, or unforeseen emergencies. Changes will be at the discretion of the Street Superintendent. If the roadway adjacent to your property cannot be swept during the scheduled days, we will attempt to complete it on one of the following Friday's.
- The regular street sweeping schedule ends in mid-October of each year. At that time, leaf sweeping will occur. Sweeping will be focused on areas with heavy leaf accumulation. This will help prevent localized flooding due to blocked storm sewer drains.
- Do not dispose of yard waste (leaves & grass clippings) in the roadway. It is a danger to motorcyclists, and a violation of City Ordinance 5.0306.
- Street sweeping is not only to beautify the area, but also to help eliminate pollutants from entering the storm sewer system and contaminating downstream rivers and lakes.
- The city street sweeping schedule will be reviewed each year. Modifications will be made as necessary to meet program goals. This will include scheduling a different zone to start the sweeping in to create a fair rotation.

1. The sweeping schedule is designed to avoid conflicts with regular scheduled garbage pickup days.
2. Please refrain from parking on the roadways during their scheduled days to be swept.
3. Initial cleanup (1st sweeping) takes longer due to the sand that is spread on the roadways during the previous winter season. The schedule reflects this.
4. Primary roadways will be swept at any time due to no parking allowed.
